Re: PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT
Shaw's Jewelry
Houston, Harris County, Texas 77019
G&AI Project No. 11-0286

Dear Mr. Dziedzic:

Gorrondona & Associates, Inc. (G&AI) is pleased to submit our Phase I Environmental Site Assessment Report for the above-referenced project. This investigation was performed in accordance with G&AI Proposal No. P11-0249 dated August 5, 2011.

We appreciate the opportunity to be of service to you on this project. We would welcome the opportunity to provide additional environmental, geotechnical engineering or construction materials testing services to you in the future. Please contact me if you have any questions.

Respectfully submitted,

Kristi D. Fluker 2011.11.07 12:41:37 -06'00'

1 SUMMARY

A Phase I Environmental Site Assessment (ESA) was conducted by Gorrondona & Associates, Inc. (G&AI) for the property identified below. This ESA was performed in accordance with ASTM Standard E 1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.*

Subject Property	a 0.5-acre tract located at the southeast corner of Montrose Boulevard and West Gray Street in Houston, Harris County, Texas.
Purpose for ESA	This ESA is being performed to establish a baseline for environmental conditions at the subject property prior to development of the subject property.

Current Use of Subject Property. The subject property is currently a private residential property. A 4-plex (1021 West Gray Street), a duplex (1007 West Gray Street), and paved and crushed rock parking areas are located on the property. The site is 100% developed. The 4-plex is located at the southeast corner of Montrose Boulevard and West Gray Street. The concrete parking area and the crushed rock parking area are located adjacent to the 4-plex to the east. The duplex is located to the east of the parking areas. Both the 4-plex and the duplex were vacant at the time that this ESA was performed.

Current Use of Adjoining Properties. Current use for the adjoining properties is presented below.

Direction	Description
North	West Gray Street, Bobbitt Glass Company, Shaw's Jewelry & Loan, and Southwestern Paint Company.
South	Private residences.
East	Studio 31 Hair Lab.
West	Montrose Boulevard and Christy's Donuts.

Historical Use of Subject Property. Apparent historical use for the subject property is provided below.

Year(s)	Subject Property Use	Reference Source
1922	Site split from north to south by a railroad track.	Historical Topographic Map
1926 to 1986	Residential and commercial.	City Directories, Fire Insurance Maps, Historical Aerial Photographs
1986 to Present	Residential.	Aerial Photographs, City Directories, Site Reconnaissance

Historical Use of Adjoining Properties. Apparent historical use for the adjoining properties is provided below.

Year(s)	North - Adjoining Property Use	Reference Source
1922	Vacant and railroad tracks.	Historical Topographic Map
1925 to 2008	Site bounded by West Gray Street and commercial properties (jewelry stores, restaurants, pharmacies/drug stores, and a music shop	Aerial Photographs, Historical Topographic Maps, City Directories, Fire Insurance Maps.
Present	Site bounded by West Gray Street and by commercial properties (Bobbitt Glass Company, Shaw's Jewelry, and Southwestern Paint Company).	Site Reconnaissance.

Year(s)	South - Adjoining Property Use	Reference Source
1922 to Present	Residential properties.	City Directories, Historical Aerial Photographs, Fire Insurance Maps, Site Reconnaissance.

Year(s)	East - Adjoining Property Use	Reference Source
1925 to Present	Retail businesses and residential properties (currently Studio 31 Hair Lab).	City Directories, Historical Aerial Photographs, Fire Insurance Maps Site Reconnaissance.

Year(s)	West - Adjoining Property Use	Reference Source
1922 to Present	Bounded by Montrose Boulevard and residential/commercial properties (currently Christy's Donuts).	Historical Aerial Photographs, Historical Topographic Maps, Fire Insurance Maps, Site Reconnaissance.

There is no evidence of depressions or landfill pits, disposal, or treatment facilities observed at the subject property in the photographs.

This assessment has revealed no evidence of recognized environmental conditions in connection with the property.

No further assessment work is recommended in order to evaluate the environmental condition of the site.

2 INTRODUCTION

2.1 Purpose

The purpose of this ESA is to identify recognized environmental conditions associated with the subject property; to assess the likelihood that contamination from hazardous substances or petroleum products may exist on the subject property either from past or present use of the subject property or nearby properties. The assessment was performed in accordance with the ASTM Standard Practice for conducting Phase I Environmental Site Assessments (Designation E 1527-05).

2.2 Detailed Scope of Services

The scope of services for the ESA includes the following:

- Subject property identification and visual survey for the presence of hazardous substances and petroleum products;
- Review of federal, state and local agency listings regarding the subject property usage;
- Review of historic maps, historic occupants and the nature of past property usage;
- Review of available soils, geology, floodplain and environmental reports for the subject property or in the vicinity of the subject property;
- Interview with persons knowledgeable about the subject property;
- Preparation of a report that summarizes observations, sources utilized, findings, and conclusions related to the presence or likely presence of hazardous substances or petroleum products on the subject property;

The scope of services for the ESA ***does not*** include the following:

- Wetlands delineation;
- Sampling or analysis to determine the presence of asbestos, lead in paint and drinking water, or radon.
- Indoor air quality surveys;
- Industrial hygiene;
- Health and safety reviews;
- Ecological resources;

- Regulatory compliance;
- Biological agents and mold; and
- High voltage power line impacts.

2.3 Significant Assumptions

This ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the subject property, within reasonable limits of time and cost. It is assumed that the client has provided G&AI with any specialized knowledge or experience that is material to recognized environmental conditions in connection with the property, including the reason why the property may have a significantly lower purchase price than comparable properties, if applicable.

In general, groundwater flow direction has been determined based on topography in the vicinity of the subject property and it is assumed that the shallow groundwater flow will follow topography. No site-specific field measurements of groundwater flow direction have been performed.

Based on this interpretation, G&AI has reviewed regulatory agency information for sites that are located in a presumed up gradient direction that based on proximity and knowledge of potential contaminant fate and transport, may present a potential to impact the subject property.

2.4 Limitations and Exceptions

Unless noted otherwise, the scope of services is limited to those elements of the ASTM standard as identified in Section 2.2 of this report. Non-ASTM scope issues (e.g. asbestos, lead-based paint, radon, wetlands, compliance audits, geotechnical investigations, etc.) are not included in the scope unless specifically addressed in Section 2.2.

The ASTM method requires a minimum aerial photograph search interval of 5 years. This search interval in not guaranteed to identify all prior tenants or occupants of the subject property. The ASTM standard also requires that the history of the subject property be traced to 1940 or prior to the first developed use, whichever is earlier. This requires that the investigator review sources that are publicly available, are available within a reasonable time and cost, and are reasonably ascertainable and considered practically reviewable, as defined under the ASTM standard. These criteria are applied with attention to the specific sources that are likely to provide information concerning possible recognized environmental conditions at the subject property. G&AI has

reviewed sources of information that we consider to meet these criteria. In cases where the history of the property is not traced to prior to its first developed use or aerial photographs search intervals do not meet the 5-year criteria; this condition is considered a data failure, and not an exception to the required scope of work.

The term recognized environmental condition has been defined at paragraph 1.1.1 of ASTM E 1527-05. The vague and ambiguous nature of the term, as defined by the ASTM standard, might result in differing opinions as to whether any observed condition at the site can be classified as a recognized environmental condition. The interpretation of the definition of the term is left to the individual conducting this ESA and no warranty is given that other experts may agree as to whether site conditions noted herein are or are not recognized environmental conditions. Users of this report are encouraged to review the report in its entirety and specifically to consider the existence of all site conditions described in this report and not merely those classified herein as recognized environmental conditions.

Surface exploration or chemical screening of soil and groundwater beneath the site was not conducted at the referenced site and, as such, G&AI cannot accurately discuss issues regarding latent subsurface conditions which may be the result of on-site or off-site sources. G&AI is not able to represent that the site or adjoining land contains no hazardous waste, oil, or other latent conditions beyond that detected or observed by G&AI during the visual inspection.

In connection with a Phase I ESA of a site as defined by G&AI's Scope of Services, limited services may affect the results of the work. It would be extremely expensive, and perhaps not possible, to conduct an investigation which would ensure the detection, quantity, concentration and/or analysis of all materials and/or substances at or near the site which are now, or in the future might be, considered hazardous, or deemed environmentally significant by Client (Materials).

Despite the use of reasonable care, G&AI may fail to detect the presence of such Materials or may incorrectly characterize Materials which are present. Therefore, G&AI cannot be held responsible for the failure of the Phase I ESA to detect or report on such Materials.

The findings set forth in the attached Phase I ESA are limited in time and scope to the date of the evaluations. In preparing this report, G&AI has relied on the records and documents, as well as statements of individuals, cited in the report. Except as may be otherwise specified in this report, no independent examination of the facts contained in the reference materials and statements have been undertaken. G&AI has assumed the contents of the records and the information provided in documents or statements are true and accurate. G&AI assumes no responsibility for conditions that did not come to

its actual knowledge or for conditions not recognized as environmentally unacceptable at the time this report was prepared.

It is particularly important that Client note the limitations of the Phase I ESA process and how uncertainties can affect conclusions. It should be noted that the consideration of what is characterized as environmental hazards or hazardous materials or hazardous substances ultimately only can be made by Client, since such area of potential environmental concern relates, in part, to business decisions made by Client, and legal issues relating thereto. Therefore, this Phase I ESA is limited by these constraints.

If information obtained as part of the proposed services suggests the need for further intrusive investigation, an expanded scope may be negotiated. However, further investigations may reveal additional data or variations of the current data that may require the enclosed conclusions be reevaluated.

The findings and conclusions of this report are not scientific certainties, but rather are based on professional judgment concerning the significance of the data gathered during the course of the ESA. The conclusions in this report are not to be considered a legal opinion as to the client's duty concerning due diligence relating to potential liabilities in leasing, owning, or purchasing real estate. The term "Phase I Environmental Site Assessment" as used by G&AI in this report is limited to the tasks and/or services set out in the SCOPE OF SERVICES and specifically excludes tasks and/or services not included in Section 2.2 of this report. Client shall note the conditions and limitations described herein. Client agrees that G&AI's liability under this project, if any, is limited to the contract amount and Client expressly agrees to indemnify and defend G&AI for any claims in excess thereof.

2.5 Special Terms and Conditions

There are no special terms and conditions related to this project.

2.6 User Reliance

This report has been prepared for the exclusive use and reliance of the client (User). Use or reliance by any other party is prohibited without the written authorization of the client and G&AI. The client (User) for this ESA is identified below.

Client (User) Information	Shaw's Jewelry 1014 West Gray Street Houston, Texas 77019 Attn: Mr. George Dziedzic

Reliance on the ESA by the client (User) and all authorized parties will be subjected to the terms, conditions and limitations stated in the proposal, ESA report and G&AI's Terms and Conditions. The limitation of liability defined in the Terms and Conditions is the aggregate limit of G&AI's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-05 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user (Client) for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-05.

3 SITE DESCRIPTION

3.1 Location and Legal Description

The location and legal description for the subject property are presented below. Site Maps are included with this report in Appendix A – Site Maps.

Property Owner	Shaw's Jewelry 1014 West Gray Street Houston, Texas 77019 Attn: Mr. George Dziedzic, General Partner
Address, City, State	The site is located at the southeast corner of Montrose Boulevard and West Gray Street, in Houston, Harris County, Texas 77019.
Map, Abstract No.	Lots 1 through 4, Block 1 of West Gray, a subdivision in Harris County, Texas, according to the map or plat thereof recorded in Volume 572, Page 151 Deed Records.
Property Area	0.5-acres

3.2 Site and Vicinity General Characteristics

The subject property is located in the area of commercial and residential properties. The site is directly surrounded on all four sides by various commercial and private residential properties.

The site is located about 0.64-miles south of Buffalo Bayou.

3.3 Current Use of Subject Property

The subject property is currently a private residential property. A 4-plex (1021 West Gray Street), a duplex (1007 West Gray Street), and paved and crushed rock parking areas are located on the property. The site is 100% developed. The 4-plex is located at the southeast corner of Montrose Boulevard and West Gray Street. The concrete parking area and the crushed rock parking area are located adjacent to the 4-plex to the east. The duplex is located to the east of the parking areas. Photographs depicting the general character of the subject and adjoining properties are included in Appendix B – Site Photographs.

3.4 Description of Structures, Roads, and Other Improvements on the Subject Property

There are two vacant residential dwellings on the site currently. The site consists of a 4-plex, located at 1021 West Gray Street, a duplex located at 1007 West Gray Street, and a concrete and crushed rock parking area. Both dwellings are 2-story, brick structures. A concrete sidewalk and West Gray Street bound the site to the north. A concrete sidewalk and Montrose Boulevard bound the site to the west.

3.5 Current Use of Adjoining Properties

Current use for the adjoining properties is presented below. Photographs depicting the general character of the subject and adjoining properties are included in Appendix B – Site Photographs.

Direction	Description
North	West Gray Street, Bobbitt Glass Company, Shaw's Jewelry & Loan, and Southwestern Paint Company.
South	Private residences.
East	Studio 31 Hair Lab.
West	Montrose Boulevard and Christy's Donuts.

4 USER PROVIDED INFORMATION

4.1 Title Records

No title records were provided by the Client (User) to G&AI.

Section 6 of ASTM E 1527-05 defines the User's responsibilities relative to the performance of a Phase I ESA. Specifically, the User must perform a review of reasonably ascertainable title and judicial records for environmental liens or activity and use limitations (AULs). The User should engage a title company or title professional to undertake a review of reasonably ascertainable recorded land title records and lien records for environmental liens or activity and use limitations currently recorded against or related to the subject property.

A review of title records was not performed as part of this study.

4.2 Environmental Liens or Activity and Use Limitations

G&AI was not provided with any information from the client, Mr. George Dziedzic (General Partner of Shaw's Jewelry), that would indicate knowledge of environmental liens against the subject property, or activity use limitations related to environmental conditions.

4.3 Specialized Knowledge

G&AI was not provided any information from Mr. George Dziedzic that would be material to G&AI's identification of recognized environmental conditions on the subject property.

4.4 Commonly Known or Reasonably Ascertainable Information

G&AI was not provided with any information from the client, Mr. George Dziedzic (General Partner of Shaw's Jewelry), that would indicate knowledge of reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases.

4.5 Valuation Reduction for Environmental Issues

G&AI was not provided any information from Mr. George Dziedzic that would indicate the property value or purchase price has been devalued, compared to comparable properties, as a result of environmental conditions at the subject property or surrounding properties.

4.6 Owner, Property Manager, and Occupant information

The subject property is owned by Shaw's Jewelry.

4.7 Reason for Performing the Phase I

This report has been prepared for the client to determine the existence of environmental conditions prior to developing the subject property.

4.8 Other

Mr. Darren Penewitt, representative of Hemes Architects, provided G&AI with the following environmental documents related to the subject site:

- "Incomplete Drawing" prepared by Hermes Architects. and dated May 21, 2011.
- "Survey of Lot 3, Block 1, of West Gray Terrace" prepared by Alltex Realty Services and dated April 9, 2003.
- "Survey of Lot 2, Block 1, of West Gray Terrace" prepared by Varas Surveying and dated June 5, 1996.
- "Survey of Lot 1, Block 1, of West Gray Terrace" prepared by Varas Surveying and dated May 30, 1996.
- "Survey of Lot 4, Block 1, of West Gray Terrace" prepared by Precision Surveyors and dated February 1, 2002

Copies of each of the above-referenced letters and reports are provided sequentially (oldest to newest) in Appendix H – Other Documents.

5 RECORDS REVIEW

5.1 Standard Environmental Record Sources

A research and review of the following selected federal and state regulatory agencies records and/or databases was provided by Environmental Data Resources Inc. (EDR) to identify any environmental permits, incidents, violations, response actions, remedial activities, and any possibly hazardous business operations relating to owners, operators or tenants on the subject site and properties surrounding the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated, and the scope herein did not include confirmation of facilities listed as unmapped by regulatory databases.

DATABASES SEARCHED TO 1 MILE:

- NPL;
- RCRA Corrective Actions (RCRA COR ACT);
- Tribal Lands; and
- State / Tribal Sites.

DATABASES SEARCHED TO 1/2 MILE:

- NPL De-Listed Sites;
- CERCLIS;
- NFRAP;
- RCRA TSD;
- Federal Institutional Controls / Engineering Controls (IC / EC);
- State / Tribal Solid Waste Landfills (SWL);
- State / Tribal Leaking Underground Storage Tanks (LUST);
- State / Tribal Engineering Controls (EC);
- State / Tribal Voluntary Cleanup Program (VCP); and
- State / Tribal Brownfields.

DATABASES SEARCHED TO 1/4 MILE:

- RCRA Generators;
- Emergency Response Notification List (ERNS);
- State Spills 90;
- State / Tribal Registered UST / AST;
- State / Tribal Institutional Controls (IC); and
- State Other.

A formal description of each of the above listed databases is included in Appendix D – Regulatory Records Documentation.

The Environmental EDR Report identified 45 mapped sites and 25 unmapped sites. Unmapped sites include all database responses within the subject area where the site is not automatically mapped by the database software. This study did not include confirmation of unmapped sites.

Mapped sites included:

- 1 CERC-NFRAP site,
- 9 Leaking Petroleum Storage Tank (LPST) sites,
- 4 Underground Storage Tank (UST) sites,
- 4 Voluntary Cleanup Program (VCP) sites,
- 3 RCRA Non-Generator (RCRA-NonGen) sites,
- 1 Drycleaner site,
- 8 Historical Auto Station sites and,
- 15 Historical Drycleaner sites.

All of the issues related to the above sites are considered suspected *Recognized Environmental Conditions, Historical Recognized Environmental Conditions or De Minimis Conditions* and are discussed in more detail in Section 8 – Findings.

5.2 Additional Environmental Record Sources

A search of the following additional environmental records sources below was performed and is included in Appendix D.

- Local Brownfield Lists
    - US Brownfields – A listing of Brownfields Sites.
- Local Lists of Landfill/Solid Waste Disposal Sites
    - Debris Region 9 – Torres Martinez Reservation Illegal Dump Site Locations.
    - ODI – Open Dump Inventory.
    - Indian ODI – Report on the Status of Open Dumps on Indian Lands.
- Local Lists of Hazardous Waste / Contaminated Sites
    - US CDL – Clandestine Drug Labs
    - DEL SHWS – Deleted Superfund Registry Sites
    - Priority Cleaners – Dry Clean Remediation Program Prioritization List.
    - US HIST CDL – National Clandestine Laboratory Register.
- Local Land Records
    - Liens 2 – CERCLA Lien Information.
    - LUCIS – Land Use Control Information System.

- LIENS – Environmental Liens Listing.
- HIST LIENS – Historical Environmental Liens Listing.

- Records of Emergency Release Reports
  - HMIRS – Hazardous Materials Information Reporting System.
  - SPILLS – Spills Database.

- Other Ascertainable Records
  - RCRA NonGen – RCRA Non-Generators.
  - DOT OPS – Incidents and Accident Data.
  - DOD – Department of Defense Sites.
  - FUDS – Formerly Used Defense Sites.
  - CONSENT – Superfund (CERCLA) Consent Decrees.
  - ROD – Records of Decision.
  - UMTRA – Uranium Mill Tailings Sites.
  - MINES – Mines Master Index File.
  - TRIS – Toxic Chemical Release Inventory System.
  - TSCA – Toxic Substances Control Act.
  - FTTS – FIFRA/TSCA Tracking System – FIFRA (Federal Insecticide, Fungicide & Rodenticide Act)/TSCA (Toxic Substances Control Act).
  - HIST FITS – FIFRA/TSCA Tracking System Administrative Case Listing.
  - SSTS – Section 7 Tracking Systems.
  - ICIS – Integrated Compliance Information System.
  - PADS – PCB Activity Database System.
  - MLTS – Material Listing Tracking Systems.
  - RADINFO – Radiation Information Database.
  - RAATS – RCRA Administrative Action Tracking System.
  - IOP - Innocent Owner/Operator Program.
  - NPDES - NPDES Facility List.
  - UIC - Underground Injection Wells Database Listing.
  - ENF - Notice of Violations Listing.
  - Ind. Haz Waste Industrial & Hazardous Waste Database.
  - ED AQUIF - Edwards Aquifer Permits.
  - AIRS - Current Emission Inventory Data.
  - MSD - Municipal Settings Designations Database.
  - TIER 2 - Tier 2 Chemical Inventory Reports.
  - RWS - Radioactive Waste Sites.
  - INDIAN RESERV - Indian Reservations.
  - SCRD DRYCLEANERS - State Coalition for Remediation of Drycleaners Listing.
  - PCB TRANSFORMER -PCB Transformer Registration Database.
  - COAL ASH EPA - Coal Combustion Residues Surface Impoundments List.
  - COAL ASH DOE - Steam-Electric Plan Operation Data.
  - GCC - Groundwater Contamination Cases.

- FINANCIAL ASSURANCE - Financial Assurance Information Listing.

- EDR Proprietary Records.
  - Manufactured Gas Plants – EDR Proprietary Manufactured Gas Plants.

The Environmental EDR Report using the additional environmental record sources identified 0 mapped sites.

5.3 Physical Setting Sources

The physical setting for the subject property is summarized below. Reference documents are provided in Appendix A - Site Maps.

Topography: The USGS Topographic Map depicts the site elevation as approximately 48 feet above sea level. The topographic map confirms site reconnaissance observations. The site appears visually flat.

Soils: The soil survey of Harris County obtained from the U.S. Department of Agriculture; Natural Resources Conservation Service identifies the soils underlying the site as *Bernard-Urban Land Complex (Bg).*

Geology: The Geologic Atlas of Texas depicts the site as being over the *Beaumont Formation, areas predominantly clay (Qbs)*. The *Beaumont Formation, areas predominantly clay,* is dominantly sand, silt, and minor gravel. The formation thickness is +/- 300 feet.

Surface Water: There are no permanent water features on the subject property. According to the most recent floodplain map published by the Federal Emergency Management Agency, the subject property is located within “Zone X”, an area outside the 100-year floodplain.

Groundwater: The subject property is located over the Gulf Coast Aquifer. Based on our experience, depth to groundwater is estimated within 20 feet of the ground surface. Isolated pockets of perched groundwater may exist above this depth. Fluctuations in groundwater levels are expected, depending upon seasonal variations in rainfall, surface water runoff, surface water infiltration, and other hydraulic factors. Actual groundwater conditions may vary due to site-specific subsurface conditions and local surface hydrology.

5.4 Historical Use Information on the Subject Property

Historical use documentation utilized for this study for the subject property is summarized below. Reference documents are provided in Appendix C – Historical Research Documentation.

Aerial Photographs: Aerial photographs maintained by Agricultural Stabilization and Conservation Services (ASCS), TxDOT, USGS and USDA were reviewed for the years 1944, 1953, 1962, 1973, 1979, 1989, 1995, 2004, 2005, and 2008. Photograph scales are typically small and detailed information is not generally obtained from the photographs.

Historical Topographic Maps: The 1922, 1946, 1955, 1967, 1982, and 1995 editions of the historical topographic map for the area of the subject property were reviewed for this assessment. The 1921, 1929, 1946, 1947, 1955, 1967, 1982, and 1995 editions of the historical topographic map for the adjoining quadrangle to the south of the subject property were also reviewed for this assessment.

Fire Insurance Maps: The 1925, 1951, and 1969 fire insurance maps depicting the subject property were reviewed for this assessment.

City Directory Review: A 1921-2004 city directory review of addresses in the nearby vicinity of the subject property was performed.

Limited Title Search: A Limited Title Search dating back to 1937 was prepared by Texas Abstract Services and reviewed by G&AI to identify possible uses or presence of hazardous substances on the site or ownership by or leases to individuals or entities conducting possibly hazardous operations. No obvious evidence of environmental impacts associated with prior use of the property was identified during the Historical Title Records review.

Apparent historical use for the subject property is provided below.

Year(s)	Subject Property Use	Reference Source
1922	Site split from north to south by a railroad track.	Historical Topographic Map
1926 to 1986	Residential and commercial.	City Directories, Fire Insurance Maps, Historical Aerial Photographs
1986 to Present	Residential.	Aerial Photographs, City Directories, Site Reconnaissance

5.5 Historical Use Information on Adjoining Properties

Historical use documentation utilized for this study for the adjoining properties is summarized below. Reference documents are provided in Appendix C – Historical Research Documentation.

Aerial Photographs: Aerial photographs maintained by Agricultural Stabilization and Conservation Services (ASCS), TxDOT, USGS and USDA were reviewed for the years 1944, 1953, 1962, 1973, 1979, 1989, 1995, 2004, 2005, and 2008. Photograph scales are typically small and detailed information is not generally obtained from the photographs.

Historical Topographic Maps: The 1922, 1946, 1955, 1967, 1982, and 1995 editions of the historical topographic map for the area of the subject property were reviewed for this assessment. The 1921, 1929, 1946, 1947, 1955, 1967, 1982, and 1995 editions of the historical topographic map for the adjoining quadrangle to the south of the subject property were also reviewed for this assessment.

Fire Insurance Maps: The 1925, 1951, and 1969 fire insurance maps depicting the subject property were reviewed for this assessment.

City Directory Review: A 1921-2004 city directory review of addresses in the nearby vicinity of the subject property was performed.

Apparent historical use for the adjoining properties is provided below.

Historical Use of Adjoining Properties. Apparent historical use for the adjoining properties is provided below.

Year(s)	North - Adjoining Property Use	Reference Source
1922	Vacant and railroad tracks.	Historical Topographic Map
1925 to 2008	Site bounded by West Gray Street and commercial properties (jewelry stores, restaurants, pharmacies/drug stores, and a music shop	Aerial Photographs, Historical Topographic Maps, City Directories, Fire Insurance Maps.
Present	Site bounded by West Gray Street and by commercial properties (Bobbitt Glass Company, Shaw's Jewelry, and Southwestern Paint Company).	Site Reconnaissance.

Year(s)	South - Adjoining Property Use	Reference Source
1922 to Present	Residential properties.	City Directories, Historical Aerial Photographs, Fire Insurance Maps, Site Reconnaissance.

Year(s)	East - Adjoining Property Use	Reference Source
1925 to Present	Retail businesses and residential properties (currently Studio 31 Hair Lab).	City Directories, Historical Aerial Photographs, Fire Insurance Maps Site Reconnaissance.

Year(s)	West - Adjoining Property Use	Reference Source
1922 to Present	Bounded by Montrose Boulevard and residential/commercial properties (currently Christy's Donuts).	Historical Aerial Photographs, Historical Topographic Maps, Fire Insurance Maps, Site Reconnaissance.

6 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

A site reconnaissance was conducted by G&AI on October 20 2010, to observe and document site conditions and identify visible indications of existing recognized environmental conditions. Reconnaissance was conducted on foot and included the property perimeter and interior of the buildings onsite. Site photographs are included in Appendix B – Site Photographs.

6.2 General Site Setting

Topography: The subject property appeared generally flat. There is no visually discernable overall drainage pattern on the property. The overall site appeared slightly higher than the surrounding streets.

Roads: West Gray Street bounds the property to the north. Montrose Boulevard bounds the property to the west.

6.3 Exterior Observations

Site Structures: There are two vacant residential dwellings on the site currently. The site consists of a 4-plex, located at 1021 West Gray Street and a duplex, located at 1007 West Gray Street.

Vegetation: The site has cultivated lawn areas consisting of trees, bushes, and grasses between the front of the 4-plex and duplex and West Gray Street.

Utilities: The site appears to be serviced by utilities including water, sewer, and telephone. This was not confirmed.

Water Features: There were no permanent water features observed on the site.

Other Observations:

Observation	No	Yes	Location (If Yes)
Underground Storage Tanks	X		
Aboveground Storage Tanks	X		
Septic Fields	X		
Drainage Systems	X		
Drums and Open Containers	X		
Dumping or Filling Activities	X		

Observation	No	Yes	Location (If Yes)
Hazardous Chemical Storage	X		
Petroleum Hydrocarbon Containers	X		
Materials Spills	X		
Monitor / Supply / Disposal Wells	X		
Odors	X		
Stained Pavement / Soil	X		
PCB-Containing Electrical Transformers		X	Along the southern border of the site, south of duplex onsite.
Pesticide Usage / Storage	X		
Pits / Ponds / Lagoons	X		
Pools of Liquid	X		
Roads / Trails with No Apparent Purpose	X		
Stressed Vegetation	X		
Toxic Substance Storage	X		
Unidentified Substance Containers	X		
Wastewater Generation	X		

PCB-Containing Electrical Transformers. Two electrical transformers were observed along the southern border of the site, south of the duplex onsite. These transformers could potentially contain PCBs. Both transformers appeared to be in good condition and free of leaks or damage. Based on the site reconnaissance, these electrical transformers do not appear to represent a recognized environmental condition in connection with the subject property.

G&AI did not visually identify any Recognized Environmental Conditions in association with the subject property during the site reconnaissance.

6.4 Interior Observations

There are two vacant residential dwellings on the site currently. The site consists of a 4-plex, located at 1021 West Gray Street and a duplex located at 1007 West Gray Street.

7 INTERVIEWS

7.1 Interview with Owner

The property is owned by the Shaw's Jewelry. On September 21, 2011, G&AI conducted a written interview (Appendix F) with Mr. George Dziedzic, who represents Shaw's Jewelry.

Mr. Dziedzic indicated that he had no knowledge of environmental liens against the subject property, pending litigation or administrative proceedings, or limitations related to environmental conditions or of the existence of hazardous substances at the site.

Mr. Dziedzic had no specialized knowledge or experience related to the property or nearby properties.

G&AI was not provided with any information from Mr. Dziedzic that would indicate knowledge of reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases.

7.2 Interview with Site Manager

Not applicable.

7.3 Interviews with Occupants

Not applicable.

7.4 Interviews with Local Government Officials

G&AI sent a formal request to Harris County Pollution Control Services Department for any information that would indicate potential environmental conditions at the site, specifically information relating to any known hazardous materials responses or chemical spill sites at or near the subject property.

On September 23, 2011, Sandee L. Wilson of Harris County Pollution Control Services Department indicated that there were no environmental findings regarding the site. A copy of Ms Wilson's letter is provided in Appendix E.

7.5 Interviews with Others

Not Applicable.

8 FINDINGS

Recognized Environmental Conditions: The following property issues, suspected to be Recognized Environmental Conditions, were identified during the course of conducting this ESA:

Item No.:	1
Site Description:	American General Investment
Site Type:	CERC-NFRAP
Address:	2908 West Dallas Street
Location Relative to Subject Property:	0.390 miles northwest of the site.

Item No.:	2
Site Description:	Chevron 601108126
Site Type:	Leaking Petroleum Storage Tank (LPST) site
Address:	1002 Montrose Boulevard
Location Relative to Subject Property:	0.267 miles north of the site.

Item No.:	3
Site Description:	Terminix International
Site Type:	LPST
Address:	1819 Waugh Drive
Location Relative to Subject Property:	0.356 miles west/southwest of the site.

Item No.:	4
Site Description:	Kentucky Fried Chicken
Site Type:	LPST
Address:	303 West Gray Street
Location Relative to Subject Property:	0.359 miles west/southwest of the site.

Item No.:	5
Site Description:	Scherry Lindley
Site Type:	LPST
Address:	1800 Waugh Drive
Location Relative to Subject Property:	0.360 miles west/southwest of the site.

Item No.:	6
Site Description:	Lot 3, Blk 1 Rosemont
Site Type:	LPST
Address:	West Gray Street & Waugh Drive
Location Relative to Subject Property:	0.380 miles west of the site.

Item No.:	7
Site Description:	Vacant Property
Site Type:	LPST
Address:	234 West Gray Street
Location Relative to Subject Property:	0.483 miles east of the site.

Item No.:	8
Site Description:	Joe's Place Watson Gas
Site Type:	LPST
Address:	2223 Montrose Boulevard
Location Relative to Subject Property:	0.244 miles south of the site.

Item No.:	9
Site Description:	Underground Service Center
Site Type:	LPST
Address:	2320 West Dallas Street
Location Relative to Subject Property:	0.303 miles north of the site.

Item No.:	10
Site Description:	Future Residence
Site Type:	LPST
Address:	1229 West Drew Street
Location Relative to Subject Property:	0.285 miles southwest of the site.

Item No.:	11
Site Description:	Sigmor Shamrock 906
Site Type:	UST
Address:	1320 Montrose Boulevard
Location Relative to Subject Property:	0.122 miles north/northwest of the site.

Item No.:	12
Site Description:	SunMart 497
Site Type:	UST
Address:	1320 Montrose Boulevard
Location Relative to Subject Property:	0.151 miles north/northwest of the site.

Item No.:	13
Site Description:	Joe's Place Watson Gas
Site Type:	UST
Address:	2223 Montrose Boulevard
Location Relative to Subject Property:	0.244 miles south of the site.

Item No.:	14
Site Description:	Field Activities Building
Site Type:	UST
Address:	2221 West Dallas Street
Location Relative to Subject Property:	0.245 miles north/northeast of the site.

Item No.:	15
Site Description:	Advantage BMW
Site Type:	VCP
Address:	1111 West Gray Street
Location Relative to Subject Property:	0.055 miles west/northwest of the site.

Item No.:	16
Site Description:	Blackwell & Eastridge, Inc.
Site Type:	VCP
Address:	1819 Waugh Drive
Location Relative to Subject Property:	0.356 miles west/southwest of the site.

Item No.:	17
Site Description:	Gulf Printing
Site Type:	VCP
Address:	2210 West Dallas Street
Location Relative to Subject Property:	0.312 miles north/northeast of the site.

Item No.:	18
Site Description:	Allen Parkway Inn
Site Type:	VCP
Address:	2121 Allen Parkway
Location Relative to Subject Property:	0.496 miles north of the site.

Item No.:	19
Site Description:	Up to Date Cleaners
Site Type:	RCRA-NonGen
Address:	714 West Gray Street
Location Relative to Subject Property:	0.184 miles east of the site.

Item No.:	20
Site Description:	Devore & Associates
Site Type:	RCRA-NonGen
Address:	1209 West Clay Street
Location Relative to Subject Property:	0.227 miles northwest of the site.

Item No.:	21
Site Description:	Clarke & Court, Inc.
Site Type:	RCRA-NonGen
Address:	1210 West Clay Street
Location Relative to Subject Property:	0.236 miles northwest of the site.

Item No.:	22
Site Description:	Up to Date Cleaners
Site Type:	Dry Cleaner
Address:	714 West Gray Street
Location Relative to Subject Property:	0.184 miles east of the site.
Item No.:	23
Site Description:	H J Johnson
Site Type:	Historical Auto Stations
Address:	1102 West Gray Street
Location Relative to Subject Property:	0.040 miles west/northwest of the site.

Item No.:	24
Site Description:	Carr Auto Service
Site Type:	Historical Auto Stations
Address:	1102 West Gray Street
Location Relative to Subject Property:	0.040 miles west/northwest of the site.

Item No.:	25
Site Description:	J E King Service Station
Site Type:	Historical Auto Stations
Address:	1114 West Gray Street
Location Relative to Subject Property:	0.066 miles west/northwest of the site.

Item No.:	26
Site Description:	Import Service
Site Type:	Historical Auto Stations
Address:	804 West Gray Street
Location Relative to Subject Property:	0.120 miles east of the site.

Item No.:	27
Site Description:	Sigmor Gas
Site Type:	Historical Auto Stations
Address:	1320 Montrose Boulevard
Location Relative to Subject Property:	0.122 miles west/northwest of the site.

Item No.:	28
Site Description:	Peoples Oil Company
Site Type:	Historical Auto Stations
Address:	1320 Montrose Boulevard
Location Relative to Subject Property:	0.151 miles north/northwest of the site.

Item No.:	29
Site Description:	Robt T Pope
Site Type:	Historical Auto Stations
Address:	806 Bomar Avenue
Location Relative to Subject Property:	0.158 miles southeast of the site.

Item No.:	30
Site Description:	K Auto Repair
Site Type:	Historical Auto Stations
Address:	1118 Montrose Boulevard
Location Relative to Subject Property:	0.224 miles north of the site.

Item No.:	31
Site Description:	West Gray Cleaners
Site Type:	Historical Cleaners
Address:	1014 West Gray Street
Location Relative to Subject Property:	0.024 miles northeast of the site.

Item No.:	32
Site Description:	West Gray Cleaners
Site Type:	Historical Cleaners
Address:	1012 West Gray Street
Location Relative to Subject Property:	0.025 miles northeast of the site.

Item No.:	33
Site Description:	Super Kleen Laundry Company
Site Type:	Historical Cleaners
Address:	1010 West Gray Street
Location Relative to Subject Property:	0.025 miles northeast of the site.

Item No.:	34 & 35
Site Description:	Crow Cleaners (two listings at the same address)
Site Type:	Historical Cleaners
Address:	1106 West Gray Street
Location Relative to Subject Property:	0.048 miles west/northwest of the site.

Item No.:	36
Site Description:	Quality Laundry and Cleaners
Site Type:	Historical Cleaners
Address:	1110 West Gray Street
Location Relative to Subject Property:	0.057 miles west/northwest of the site.

Item No.:	37
Site Description:	Kwik Wash and Dry Cleaning
Site Type:	Historical Cleaners
Address:	1316 Montrose Boulevard
Location Relative to Subject Property:	0.123 miles north/northwest of the site.

Item No.:	38
Site Description:	Pilgrim Laundry
Site Type:	Historical Cleaners
Address:	1306 Montrose Boulevard
Location Relative to Subject Property:	0.127 miles north/northwest of the site.

Item No.:	39 & 40
Site Description:	Pilgrim Cleaners (two listings at the same address)
Site Type:	Historical Cleaners
Address:	1304 Montrose Boulevard
Location Relative to Subject Property:	0.128 miles north/northwest of the site.

Item No.:	41
Site Description:	Up to Date Cleaners
Site Type:	Historical Cleaners
Address:	714 West Gray Street
Location Relative to Subject Property:	0.164 miles east of the site.

Item No.:	42
Site Description:	Neighborhood Cleaners
Site Type:	Historical Cleaners
Address:	712 West Gray Street
Location Relative to Subject Property:	0.164 miles east of the site.

Item No.:	43
Site Description:	West Gray
Site Type:	Historical Cleaners
Address:	710 West Gray Street
Location Relative to Subject Property:	0.165 miles northeast of the site.

Item No.:	44
Site Description:	Super Steam, Inc.
Site Type:	Historical Cleaners
Address:	1201 West Clay Avenue
Location Relative to Subject Property:	0.210 miles northwest of the site.

Item No.:	45
Site Description:	Courtesy Cleaners
Site Type:	Historical Cleaners
Address:	812 Welch Avenue
Location Relative to Subject Property:	0.234 miles south/southeast of the site.

Historical Recognized Environmental Conditions: No property issues, suspected to be Historical Recognized Environmental Conditions, were identified during the course of conducting this ESA.

De Minimis Conditions: No property issues, suspected to be de minimis conditions, were identified during the course of conducting this ESA.

Data Gaps: There were no data gaps encountered during this assessment which would affect the ability of G&AI to identify recognized environmental conditions at the site.

Other: None.

9 OPINION

The Environmental Professional's opinion of the impact on the subject property of conditions identified in the Findings section is provided in this section.

Item No.:	1
Site Description:	American General Investment
Site Type:	CERC-NFRAP
Address:	2908 West Dallas Street
Location Relative to Subject Property:	0.390 miles northwest of the site.
Discussion:	A CERC-NFRAP listing indicates that to the best of the EPA's knowledge, assessment at the site has been completed and not further actions have been required.
Opinion:	Based upon data contained in the EDR report, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	2
Site Description:	Chevron 601108126
Site Type:	Leaking Petroleum Storage Tank (LPST) site
Address:	1002 Montrose Boulevard
Location Relative to Subject Property:	0.267 miles north of the site.
Discussion:	The TCEQ has issued a final concurrence and has closed the case.
Opinion:	Based upon data contained in the EDR report, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	3
Site Description:	Terminix International
Site Type:	LPST
Address:	1819 Waugh Drive
Location Relative to Subject Property:	0.356 miles west/southwest of the site.
Discussion:	The TCEQ has issued a final concurrence and has closed the case.
Opinion:	Based upon data contained in the EDR report, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	4
Site Description:	Kentucky Fried Chicken
Site Type:	LPST
Address:	303 West Gray Street
Location Relative to Subject Property:	0.359 miles west/southwest of the site.
Discussion:	The TCEQ has issued a final concurrence and has closed the case.
Opinion:	Based upon data contained in the EDR report, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	5
Site Description:	Scherry Lindley
Site Type:	LPST
Address:	1800 Waugh Drive
Location Relative to Subject Property:	0.360 miles west/southwest of the site.
Discussion:	The TCEQ has issued a final concurrence and has closed the case.
Opinion:	Based upon data contained in the EDR report, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	6
Site Description:	Lot 3, Blk 1 Rosemont
Site Type:	LPST
Address:	West Gray Street & Waugh Drive
Location Relative to Subject Property:	0.380 miles west of the site.
Discussion:	The TCEQ has issued a final concurrence and has closed the case.
Opinion:	Based upon data contained in the EDR report, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	7
Site Description:	Vacant Property
Site Type:	LPST
Address:	234 West Gray Street
Location Relative to Subject Property:	0.483 miles east of the site.
Discussion:	The TCEQ will issue a final concurrence and close the case when well plugging documentation is submitted.
Opinion:	Based upon data contained in the EDR report and TCEQ records, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	8
Site Description:	Joe's Place Watson Gas
Site Type:	LPST
Address:	2223 Montrose Boulevard
Location Relative to Subject Property:	0.244 miles south of the site.
Discussion:	The TCEQ has issued a final concurrence and has closed the case.
Opinion:	Based upon data contained in the EDR report, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	9
Site Description:	Underground Service Center
Site Type:	LPST
Address:	2320 West Dallas Street
Location Relative to Subject Property:	0.303 miles north of the site.
Discussion:	The TCEQ has issued a final concurrence and has closed the case.
Opinion:	Based upon data contained in the EDR report, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	10
Site Description:	Future Residence
Site Type:	LPST
Address:	1229 West Drew Street
Location Relative to Subject Property:	0.285 miles southwest of the site.
Discussion:	The TCEQ has issued a final concurrence and has closed the case.
Opinion:	Based upon data contained in the EDR report, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	11
Site Description:	Sigmor Shamrock 906
Site Type:	UST
Address:	1320 Montrose Boulevard
Location Relative to Subject Property:	0.122 miles north/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming its ongoing proper operation, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	12
Site Description:	SunMart 497
Site Type:	UST
Address:	1320 Montrose Boulevard
Location Relative to Subject Property:	0.151 miles north/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming its ongoing proper operation, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	13
Site Description:	Joe's Place Watson Gas
Site Type:	UST
Address:	2223 Montrose Boulevard
Location Relative to Subject Property:	0.244 miles south of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming its ongoing proper operation, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	14
Site Description:	Field Activities Building
Site Type:	UST
Address:	2221 West Dallas Street
Location Relative to Subject Property:	0.245 miles north/northeast of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming its ongoing proper operation, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	15
Site Description:	Advantage BMW
Site Type:	VCP
Address:	1111 West Gray Street
Location Relative to Subject Property:	0.055 miles west/northwest of the site.
Discussion:	Contaminated surface soils were removed and groundwater was remediated. The cleanup was completed and the case was closed in December 2008.
Opinion:	Based upon data contained in the EDR report and TCEQ records, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	16
Site Description:	Blackwell & Eastridge, Inc.
Site Type:	VCP
Address:	1819 Waugh Drive
Location Relative to Subject Property:	0.356 miles west/southwest of the site.
Discussion:	Contaminated surface soils were removed from the property. The cleanup was completed and the case was closed in February 1999.
Opinion:	Based upon data contained in the EDR report and TCEQ records, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	17
Site Description:	Gulf Printing
Site Type:	VCP
Address:	2210 West Dallas Street
Location Relative to Subject Property:	0.312 miles north/northeast of the site.
Discussion:	Contaminated surface soils were removed from the property. The cleanup was completed and the case was closed in April 1998.
Opinion:	Based upon data contained in the EDR report and TCEQ records, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	18
Site Description:	Allen Parkway Inn
Site Type:	VCP
Address:	2121 Allen Parkway
Location Relative to Subject Property:	0.496 miles north of the site.
Discussion:	Contaminated groundwater was remediated. The cleanup was completed and the case was closed in December 1998.
Opinion:	Based upon data contained in the EDR report and TCEQ records, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	19
Site Description:	Up to Date Cleaners
Site Type:	RCRA-NonGen
Address:	714 West Gray Street
Location Relative to Subject Property:	0.184 miles east of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming its ongoing proper operation, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	20
Site Description:	Devore & Associates
Site Type:	RCRA-NonGen
Address:	1209 West Clay Street
Location Relative to Subject Property:	0.227 miles northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming its ongoing proper operation, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	21
Site Description:	Clarke & Court, Inc.
Site Type:	RCRA-NonGen
Address:	1210 West Clay Street
Location Relative to Subject Property:	0.236 miles northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming its ongoing proper operation, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	22
Site Description:	Up to Date Cleaners
Site Type:	Dry Cleaner
Address:	714 West Gray Street
Location Relative to Subject Property:	0.184 miles east of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming its ongoing proper operation, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	23
Site Description:	H J Johnson
Site Type:	Historical Auto Stations
Address:	1102 West Gray Street
Location Relative to Subject Property:	0.040 miles west/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	24
Site Description:	Carr Auto Service
Site Type:	Historical Auto Stations
Address:	1102 West Gray Street
Location Relative to Subject Property:	0.040 miles west/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	25
Site Description:	J E King Service Station
Site Type:	Historical Auto Stations
Address:	1114 West Gray Street
Location Relative to Subject Property:	0.066 miles west/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	26
Site Description:	Import Service
Site Type:	Historical Auto Stations
Address:	804 West Gray Street
Location Relative to Subject Property:	0.120 miles east of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	27
Site Description:	Sigmor Gas
Site Type:	Historical Auto Stations
Address:	1320 Montrose Boulevard
Location Relative to Subject Property:	0.122 miles west/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	28
Site Description:	Peoples Oil Company
Site Type:	Historical Auto Stations
Address:	1320 Montrose Boulevard
Location Relative to Subject Property:	0.151 miles north/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	29
Site Description:	Robt T Pope
Site Type:	Historical Auto Stations
Address:	806 Bomar Avenue
Location Relative to Subject Property:	0.158 miles southeast of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	30
Site Description:	K Auto Repair
Site Type:	Historical Auto Stations
Address:	1118 Montrose Boulevard
Location Relative to Subject Property:	0.224 miles north of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	31
Site Description:	West Gray Cleaners
Site Type:	Historical Cleaners
Address:	1014 West Gray Street
Location Relative to Subject Property:	0.024 miles northeast of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	32
Site Description:	West Gray Cleaners
Site Type:	Historical Cleaners
Address:	1012 West Gray Street
Location Relative to Subject Property:	0.025 miles northeast of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	33
Site Description:	Super Kleen Laundry Company
Site Type:	Historical Cleaners
Address:	1010 West Gray Street
Location Relative to Subject Property:	0.025 miles northeast of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	34 & 35
Site Description:	Crow Cleaners (two listings at the same address)
Site Type:	Historical Cleaners
Address:	1106 West Gray Street
Location Relative to Subject Property:	0.048 miles west/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	36
Site Description:	Quality Laundry and Cleaners
Site Type:	Historical Cleaners
Address:	1110 West Gray Street
Location Relative to Subject Property:	0.057 miles west/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	37
Site Description:	Kwik Wash and Dry Cleaning
Site Type:	Historical Cleaners
Address:	1316 Montrose Boulevard
Location Relative to Subject Property:	0.123 miles north/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	38
Site Description:	Pilgrim Laundry
Site Type:	Historical Cleaners
Address:	1306 Montrose Boulevard
Location Relative to Subject Property:	0.127 miles north/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	39 & 40
Site Description:	Pilgrim Cleaners (two listings at the same address)
Site Type:	Historical Cleaners
Address:	1304 Montrose Boulevard
Location Relative to Subject Property:	0.128 miles north/northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	41
Site Description:	Up to Date Cleaners
Site Type:	Historical Cleaners
Address:	714 West Gray Street
Location Relative to Subject Property:	0.164 miles east of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	42
Site Description:	Neighborhood Cleaners
Site Type:	Historical Cleaners
Address:	712 West Gray Street
Location Relative to Subject Property:	0.164 miles east of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	43
Site Description:	West Gray
Site Type:	Historical Cleaners
Address:	710 West Gray Street
Location Relative to Subject Property:	0.165 miles northeast of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	44
Site Description:	Super Steam, Inc.
Site Type:	Historical Cleaners
Address:	1201 West Clay Avenue
Location Relative to Subject Property:	0.210 miles northwest of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

Item No.:	45
Site Description:	Courtesy Cleaners.
Site Type:	Historical Cleaners
Address:	812 Welch Avenue
Location Relative to Subject Property:	0.234 miles south/southeast of the site.
Discussion:	There is no environmentally related data in the EDR database regarding this site.
Opinion:	Based upon the fact there are no listings for the site and assuming the facility was operated properly, it is the Environmental Professional's opinion that this site is not a recognized environmental condition.

10 CONCLUSIONS

Gorrondona & Associates, Inc. (G&AI) has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of Lots 1 through 4, Block 1 of West Gray, a subdivision in Harris County, Texas, according to the map or plat thereof recorded in Volume 572, Page 151 Deed Records, the subject property. Any exceptions to, or deletions from, this practice are described in Section 11. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the subject property.

11 DEVIATIONS

In the professional opinion of G&AI, there were no material deviations from ASTM E 1527-05 in the performance of this Phase I ESA.

12 ADDITIONAL SERVICES

This ESA was performed in accordance with ASTM Standard E 1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.* No additional services beyond this minimum standard were requested by or performed for the Client (User) as part of this study.

Beaumont Formation, areas predominantly sand

Beaumont Formation, areas predominantly sand

State	Texas
Name	Beaumont Formation, areas predominantly sand
Geologic age	Phanerozoic | Cenozoic | Quaternary | Pleistocene-Late
Original map label	Qbs
Comments	(from Moore and Wermund, 1993a, 1993b) Yellowish- to brownish-gray, locally reddish orange, v. fine to fine quartz sand, silt, and minor fine gravel, intermixed and interbedded. Includes stream channel, point-bar, cravasse-splay, and natural levee ridge deposits, and clayey fill in abandoned channels. Forms poorly defined meander-belt ridges and pimple mounds aligned approx. normal to coast and 1-2 m higher than surround interdistributary silt and clay. Channel fill is dk-brn to brnish-dark-gray, laminated clay and silt, organic -rich. Includes marine delta-front sand, lagoonal clay, and near -shore marine sand beneath and landward of bays along the coast. Interfingers with the interdistributary facies of Beuamont Fm. and rests disconformably on Lissie Fm. Thickness 3-10 m on outcrop; thickens in southeastward in subsurface to more than 100 m.
Primary rock type	sand
Secondary rock type	silt
Other rock types	clay or mud; gravel

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://soils.usda.gov/sqi/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (http://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://soils.usda.gov/contact/state_offices/).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Soil Data Mart Web site or the NRCS Web Soil Survey. The Soil Data Mart is the data storage site for the official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means

for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil scientists classified and named the soils in the survey area, they compared the

individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

Map Scale: 1:359 if printed on A size (8.5" × 11") sheet.

The soil surveys that comprise your AOI were mapped at 1:20,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for accurate map measurements.

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Harris County, Texas

Bg—Bernard-Urban land complex

Map Unit Setting

Elevation: 0 to 4,000 feet
Mean annual precipitation: 8 to 60 inches
Mean annual air temperature: 54 to 73 degrees F
Frost-free period: 180 to 310 days

Map Unit Composition

Bernard and similar soils: 55 percent
Urban land: 35 percent
Minor components: 10 percent

Description of Bernard

Setting

Landform: Meander scrolls
Landform position (three-dimensional): Talf
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Loamy fluviomarine deposits of late pleistocene age

Properties and qualities

Slope: 0 to 1 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)
Depth to water table: About 18 to 30 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum content: 20 percent
Available water capacity: High (about 9.9 inches)

Interpretive groups

Land capability classification (irrigated): 2w
Land capability (nonirrigated): 2w
Ecological site: Blackland 24-44" PZ (R150AY526TX)

Typical profile

0 to 6 inches: Clay loam
6 to 34 inches: Clay
34 to 65 inches: Clay

Description of Urban Land

Interpretive groups

Land capability (nonirrigated): 8s

Typical profile

0 to 40 inches: Variable

Minor Components

Unnamed, minor components
Percent of map unit: 10 percent

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through 2004. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

HISTORICAL OWNERSHIP REPORT

September 28, 2011 Control No. 17581

Jackie Goodwin
Gorrondona & Associates, Inc.
8815 Solon Road, Ste. F-5
Houston, Texas 77064

Site Name: 11-0286 Shaw's Jewelry

SUBJECT PROPERTY: Lots 1 through 4, Block 1 of West Gray, a subdivision in Harris County, Texas, according to the map or plat thereof recorded in Volume 572, Page 151 Deed Records.

Dear Ms. Goodwin:

At your request, we have searched the records of the County Clerk of Harris County, Texas, pertaining to the property referenced above from January 1, 1955 and have determined that the following list represents all of the deeds we find of record within the said period.

As to Lot 1, Block 1, West Gray Terrace

DATE:	07/06/1937
INSTRUMENT:	Substitute Trustee's Deed
GRANTOR:	A.B. Loper and wife, Worden Loper, by Substitute Trustee
GRANTEE:	Home Owner's Loan Corporation
COMMENTS:	Lot 1, Block 1, West Gray Terrace
REFERENCE:	1052/624 Deed Records

DATE:	04/15/1940
INSTRUMENT:	Warranty Deed
GRANTOR:	Home Owner's Loan Corporation
GRANTEE:	R.E. Jackson and wife, Thelma Jackson
COMMENTS:	Lot 1, Block 1, West Gray Terrace
REFERENCE:	1165/216 Deed Records

DATE:	05/15/1944
INSTRUMENT:	Warranty Deed
GRANTOR:	Thelma Grace Jackson
GRANTEE:	Robert Elgin Jackson
COMMENTS:	Lot 1, Block 1, West Gray Terrace
REFERENCE:	1506/602 Deed Records

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS

sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/25/2011 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Texas Commission on Environmental Quality's Petroleum Storage Tank Database.

A review of the UST list, as provided by EDR, and dated 08/05/2011 has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there are 3 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 8 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

EDR Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

A review of the EDR Historical Cleaners list, as provided by EDR, has revealed that there are 15 EDR Historical Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

Historical Generators:

Date form received by agency:	06/12/1987
Facility name:	DEVORE & ASSOCIATES INC
Site name:	DEVORE & ASSOCIATES INC
Classification:	Small Quantity Generator

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Waste code:	D002

DEVORE & ASSOCIATES INC (Continued) **1000341282**

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D011
Waste name: SILVER

Violation Status: No violations found

FINDS:

Registry ID: 110005038011

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

GULF PRINTING (Continued) **1000227243**

redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/31/2011

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2011

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2011

Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/15/2011

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Data Release Frequency: Annually

State- and tribal - equivalent NPL

SHWS: State Superfund Registry

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/15/2011
Date Data Arrived at EDR: 07/15/2011

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Next Scheduled EDR Contact: 12/26/2011
Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

GCC: Groundwater Contamination Cases
Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report is required to contain a description of each case of groundwater contamination documented during the previous calendar year. Also to be included, is a description of each case of contamination documented during previous periods for which voluntary clean up action was incomplete at the time the preceding report was issued. The report is also required to indicate the status of enforcement action for each listed case.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Facility List
Source: Department of Protective & Regulatory Services
Telephone: 512-438-3269

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

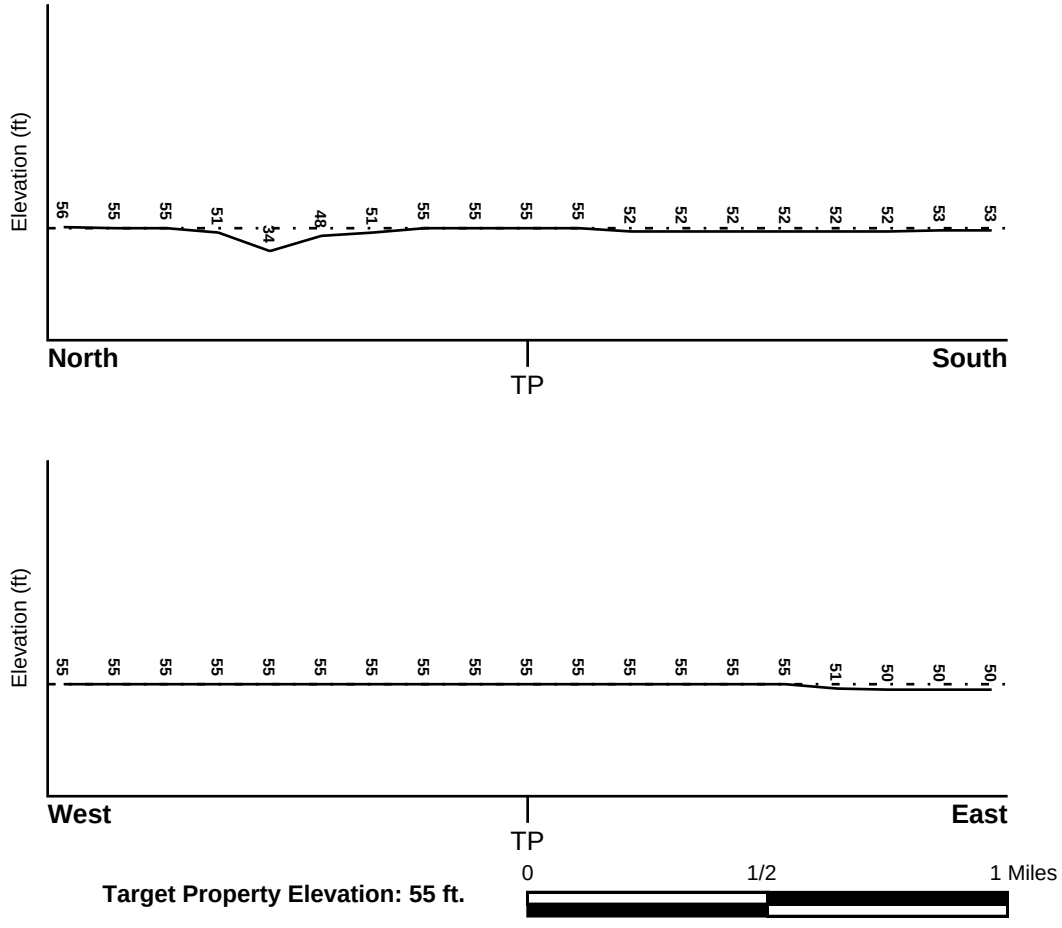
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NE
Site Name:	ALLEN PARKWAY VILLAGE
Site EPA ID Number:	TXD988085478
Groundwater Flow Direction:	SE ON A REGIONAL BASIS.
Inferred Depth to Water:	200 feet below mean sea level in the upper unit of the Chicot aquifer.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Soil at the site is characterized as somewhat poorly drained, with a very slow permeability.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Bernard

Soil Surface Texture: clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6
2	5 inches	33 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6
3	33 inches	64 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: Lake charles

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6
2	9 inches	22 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6
3	22 inches	74 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6
4	74 inches	79 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Shaw's Jewelry
Houston, Harris County, Texas 77019

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownsfields Revitalization Act of 2001 the following information listed in the table below (if available) must be requested from the user by the environmental professional. Failure to request this information could result in a determination that "all appropriate inquiry" is not complete.

1.	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? If yes, please describe.	☐ Yes	☑ No
2.	Are you aware of any environmentally related Activity Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? If yes, please describe.	☐ Yes	☑ No
3.	Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? If yes, please describe.	☑ Yes	☐ No
4.	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If no, please provide an explanation for the lower price.	☑ Yes	☐ No
5.	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? If yes, please describe	☐ Yes	☑ No
6.	Do you know the past uses of the property? If yes, please describe.	☑ Yes	☐ No
7.	Do you know of specific chemicals that are present or once were present at the property? If yes, please describe.	☐ Yes	☑ No
8.	Do you know of spills or other chemical releases that have taken place at the property? If yes, please describe.	☐ Yes	☑ No
9.	Do you know of any environmental cleanups that have taken place at the property? If yes, please describe.	☐ Yes	☑ No
10.	Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? If yes, please describe.	☐ Yes	☑ No
11.	Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property? If yes, please describe.	☐ Yes	☑ No
12.	Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property? If yes, please describe.	☐ Yes	☑ No
13.	Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? If yes, please describe.	☐ Yes	☑ No

Re: **SE corner of Montrose Blvd. and West Gray Ave**

Jaclyn:

I have researched the Harris County Pollution Control Services Department files.

I **did not** - locate any investigation reports, letters of correspondence, or any other sort of documents pertaining to the above referenced site location.

If I can be of further assistance to you please let me know.

Sandee L. Wilson

Appendix F – Special Contraction Conditions between User and Environmental Professional

Not Applicable

Appendix G – Qualification of the Environmental Professional

KRISTI D. FLUKER
ENVIRONMENTAL SPECIALIST
GORRONDONA & ASSOCIATES, INC.

EDUCATION

Texas A&M University – Corpus Christi, Bachelor of Science in Biology, 2002.

CERTIFICATIONS

OSHA 40-Hour HAZWOPER (JUN 2004)
OSHA 8-Hour HAZWOPER Refresher (JUN 2011)
Wetlands Delineation Certification (2003)

PROFESSIONAL EXPERIENCE

Ms. Fluker has 10 years of experience in the environmental and regulatory fields. She has completed and actively participated in Phase I and II Environmental Site Assessments, wetlands determinations and delineations, environmental compliance assistance, and groundwater contamination plume delineations and remediation. Ms. Fluker has provided hazardous waste and environmental compliance assistance in Texas, Louisiana, California, Washington, Virginia, West Virginia, New Jersey, Ohio, North Carolina, South Carolina, Illinois, Michigan, Florida, and Canada. She has been responsible for monitor well installation, soil, groundwater, surface water, and stormwater sampling as well as organic vapor air monitoring. In addition, Ms. Fluker has been responsible for conducting avian and threatened & endangered species field surveys.

RELATED PROJECT EXPERIENCE

Gulf South Pipeline Company – Edna, Longview, & Spring, Texas facilities

- Delineated soil and groundwater contamination plumes associated with natural gas pipeline compressor stations and operations.
- Installed monitor wells and performed soil and groundwater sampling events.
- Removal and remediation of contaminated soils and in-situ treatment programs of contaminated groundwater plumes.

Groendyke Transport, Inc. – Angleton, Channelview, Beaumont, & Texas City, TX facilities

- Conducted soil sampling events and installed monitor wells to delineate contamination plumes in soil and groundwater at tank truck cleaning terminals.
- Conducted quarterly groundwater monitoring events.
- Removed underground storage tanks and concrete drains/sumps as part of a removal and remediation project

Quality Carriers, Inc. – Luling, LA facility

- Conducted an initial site investigation and drilling/soil sampling activities to determine and delineate soil contamination at the tank truck cleaning terminal surrounding aboveground storage tanks.

Qualawash Systems, Inc & Qualawash Holdings, LLC – Texas, Ohio, Virginia, West Virginia, & Washington facilities

- Performed Phase I Environmental Site Assessments for tank truck cleaning terminals.

Superior Carriers, Inc. – Oakland, New Jersey facility

- Performed Phase I Environmental Site Assessment for a tractor-trailer truck maintenance shop and tank truck cleaning facility.

Houston Fuel Oil - Houston, Texas facility

- Conducted quarterly groundwater monitoring events sampling for contaminates associated with a marine fuel oil terminal.

Texas Molecular, Nova Molecular Technologies, & Chemetall Foote Corporation – Pasadena, Texas facilities

- Conducted fugitive emissions monitoring events (monthly, quarterly, and annually) for all tanks, stacks, flares, distillations columns, valves, and relief devices.
